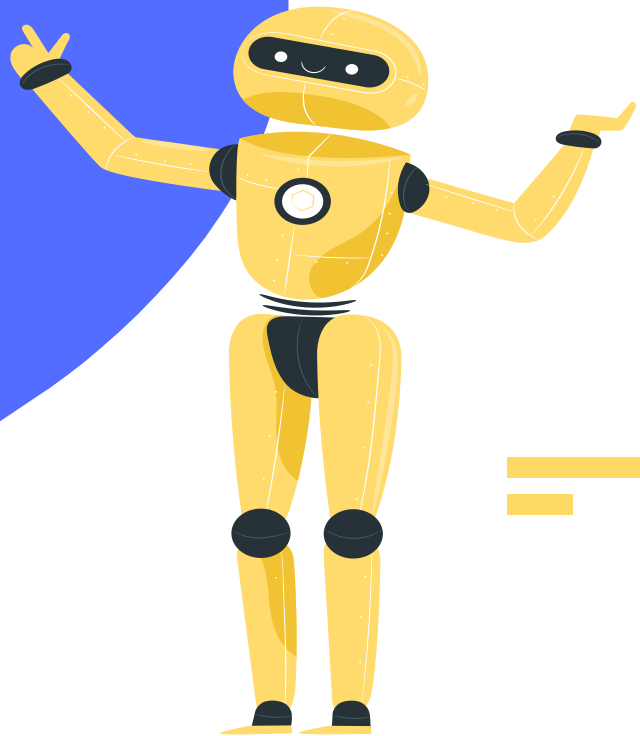
iAttendance System

Faceapp Digital

We have made online attendance easy.



80% of Success is showing Up

Research shows that missing 10 percent of the school, or about 18 days in most school districts, negatively affects a student's academic performance. That's just two days a month and that's known as chronic absence

Most school districts and states don't look at all the right data to improve school attendance. They track how many students show up every day and how many are skipping school without an excuse, but not how many are missing so many days in excused and unexcused absence that they are headed off track academically
